Address: 76, SAI Brindhavan Villa Plots, Rajbhavi Rd, Kavary Nagar, Madhuranagara, Bengaluru, Karnataka 560087

PROFESSIONAL SUMMARY

- Highly accomplished Lead Software Engineer with **9 years** of robust experience architecting, scaling, and securing enterprise-grade full-stack applications across the complete software development life cycle (SDLC).
- Proven expertise in **Java 21, Spring Boot 3.x, React.js**, and cloud-native microservices, with a track record of driving system migrations that improved high-concurrency throughput by 35% and mitigated 40+ high-severity CVEs.
- Technical proficiency spans the complete **Spring ecosystem (Security, Cloud)**, distributed event streaming (**Kafka Stream**), **Elasticsearch indexing**, and cloud DevOps tooling including **AWS EKS, Docker, and Kubernetes**.
- Adept at leading cross-functional Agile teams to design secure zero-trust architectures (**mTLS, OAuth 2.0**), manage cloud-native deployments, and optimize high-throughput service-to-service communication using **Apache Kafka**.

KEY SKILLS

Programming Language: JAVA (up to Java 21), JavaScript, Node.js, SQL

Backend Framework: Spring Boot 3.x, Spring Framework 6/7, Spring Security, Flowable BPM

Data Access & Processing: Spring Cloud, Spring Batch, Spring Data JPA, Hibernate

Event Streaming & Messaging: Apache Kafka

Search Engine & Indexing: Apache Solr, Elasticsearch

Architecture & Protocol: Microservices, RESTful Web Services, GraphQL, mTLS, OAuth 2.0, Zero Trust, MVC

Frontend & Web Technology: React.js, Redux, HTML5, CSS3, jQuery, Bootstrap, AJAX

Database & Storage: PostgreSQL, MySQL, Oracle, Redis, Cassandra, MongoDB, Azure Blob, H2

Cloud & DevOps Tool: AWS (EC2/S3), EKS, AKS, Docker, Kubernetes, Jenkins, CI/CD Pipelines

Monitoring & Security: Grafana, Splunk, Kibana, Istio (Service Mesh), SonarQube, xMatters

Tools & Version Control: Git, GitHub, IntelliJ IDEA, VS Code, JMeter, VisualVM

Operating System: Linux, Mac, Windows

PROFESSIONAL EXPERIENCE

Ivanti, Bangalore (via ASM Technologies) | Lead Engineer - Ivanti Access Product Team | AUG 2025 - Present

- Engineered high-throughput enterprise microservices for the Ivanti Access identity product, embedding modern zero-trust security frameworks to automate Conditional Access and seamless Zero Sign-On (ZSO) authentication.
- Led a team of 4 software engineers to orchestrate the end-to-end migration of enterprise microservices from Java 11 to Java 17 and 21, successfully leveraging virtual threads to improve high-concurrency throughput by 35%.
- Collaborate with cross-functional teams to architect and execute a seamless upgrade framework from Spring Boot 2.x (Spring 5) to Spring Boot 3.x (Spring 6), effectively mitigating over 40+ high-severity security vulnerabilities (CVEs) across legacy dependencies.
- Engineered and integrated highly secure RESTful APIs utilizing modern HTTP interfaces, establishing automated X.509 certificate generation and mTLS protocols to guarantee tamper-proof service-to-service communication.
- Reduced production bugs by 25% by leading code reviews and setting up SonarQube quality gates to enforce zero-trust security standards.

Bounteous X Accolite, Bangalore | Technical Lead Engineer | JAN 2025 - AUG 2025

- Engineered and scaled an automated document approval framework for private wealth management (PWM) client onboarding, integrating directly with core platform systems for Morgan Stanley.

- Led an Agile team of 4 software engineers, orchestrating task delegation, cross-functional project alignment, and seamless front-end to back-end architecture integrations.
- Implemented secure RESTful API and SOAP endpoints for distributed service-to-service communication; established strict unit testing layers and quality gates to enforce zero-defect code deployment.

Walmart Global Tech, Bangalore | Software Engineer III | FEB 2022 - JAN 2025

- Led an Agile team of 4 software engineers utilizing Scrum methodologies to deliver 3 core People Tech products (People-API, External-Apply, and File-Resource-Service) 2 weeks ahead of schedule, boosting sprint velocity by 15%.
- Designed, developed, and maintained enterprise web applications by actively participating in end-to-end architectural design, system implementation, and new feature development using Java, Node.js, and Spring Boot.
- Designed and deployed 15+ RESTful and GraphQL APIs using Spring Boot, reducing data latency by 22% and improving service-to-service communication efficiency for 3M+ active users.
- Coordinated with cross-functional teams to map technical requirements, aligning backend microservices with front-end React.js, HTML5, CSS3, and JavaScript architectures to engineer responsive, user-friendly UI components.
- Integrated and optimized distributed storage and databases, leveraging MSSQL, Azure Blob, and MeghaCache (Memcached) to guarantee highly efficient data storage, rapid indexing, and retrieval.
- Enforced strict 100% code quality and system security standards across the engineering lifecycle by implementing Spring Security, conducting peer code reviews, executing unit testing/debugging, and setting up Grafana, Kibana, and Splunk for logging/monitoring with xMatters for real-time alerting.

Magicbricks, Bangalore | Software Engineer | MAR 2020 - FEB 2022

- Worked on debugging and fixing the production and non-production application issues.
- Architected and developed high-scale backend engines for core property ecosystems (Rental Agreement, Home Loan, Search, mbContact, ContactBroker, and PropertyDetails) leveraging Spring Boot, Spring MVC, Spring Batch, and Apache Kafka.
- Optimized global product search and system indexing capabilities using Apache Solr, alongside integrating highly responsive React.js, Redux, and JavaScript frontend UI components.
- Streamlined distributed data management layers by tuning and scaling MySQL, Redis, and Cassandra database storage clusters; maintained 100% code quality metrics by enforcing rigid linting standards and debugging core productions issues.

Kuliza, Bangalore | Software Developer | SEP 2019 - MAR 2020

- Developed a high-throughput Loan Origination System (LOS) utilizing a robust backend stack of Java, Spring Boot, Hibernate and PostgreSQL, deployed on an Apache Tomcat server framework.
- Architected and integrated automated business workflows using Flowable BPM, streamlining complex multi-step processes and reducing manual processing dependencies.
- Secured application infrastructure by implementing Keycloak as the centralized Identity and Access Management (IAM) server, enforcing secure OAuth 2.0 protocol standards.

Dexel Electronics, Bangalore | Software Engineer | NOV 2017 - SEP 2019

- Developed robust full-stack software architectures for a suite of enterprise products (dexHrms, onsiteEM, BEL ARM2 DBQ, Aditya MSSC, IOCL, PMT, and Sukshm) utilizing Spring Boot, Spring MVC, and Hibernate backend layers.
- Engineered responsive, dynamic web interfaces by integrating MySQL and Redis storage systems with front-end technologies including React.js, jQuery, AJAX, Bootstrap, and interactive UI plugins.

EDUCATION

- 2016 | B.Tech in CSE — UNITED College of Engineering & Research, Greater Noida | Marks: **68%**
- 2012 | 12th Standard — R.B.S College, Hajipur | Marks: **68.8%**
- 2010 | 10th Standard — K.R.K High School, Bihar State Board | Marks: **71.2%**
